

**Science, Engineering,
Technology & Math**

Fun Facts Youtube Channel

Class Structure

The purpose of this class is to introduce how to research facts about topics of interest. Then working as a team make and edit a video to be uploaded to a class Youtube channel. Groups used ipads and cameras to film their fact videos then imported them to imovie. Next each group edited their video to upload to Youtube

Week #1:

What is research?

What are different ways that research can be done?

Are all sources and facts reliable?
what are some ways you can tell?

Week #2: Video One **Halloween**

Week #3: video two **sports (specific or in general)**

Week #4: video three

Video games
video genres

Week #5: video four

science
technology
history

Week #6: video five

animals
approved group choice

Week #7: Finish up all projects

Materials & Supplies

- *Computers*
 - *have class research facts*
- *Ipads or cameras*
 - *record a video that tells the facts the group found*
- *Imovie or other editing software*
 - *transfer video from ipad of camera and edit*
- *paper or notebooks (one for each group)*
- *pens*

Setting up class Youtube channel

- *create separate class email account*
- *Sign into youtube*
- *Click My Channel on left hand side*
- *Edit cover art and picture if desired*
- *upload videos*
 - *videos will not be public*
 - *to make public go to video manager*
 - *On video click the lock lock picture on the right side and select public (earth picture)*

When uploading from computer or ipad it will ask for the account name (email) for the Youtube channel and the password

Pro Tips by Jordan Greenhalgh

- *Split the class into at least two different groups (or smaller groups of at least three or four) to work on videos as a team so that everyone has something to do*
- *Have a requirement for a minimum number of facts per a video so that they don't only do two facts*
- *Give them a topic or a couple of topics to choose from for each video if they have too much choice they have a difficult time picking a topic and making a video*
- *Keep the password for the youtube account so that they have to get videos approved by you before they are uploaded to your class Youtube channel*
